

GoalsGetter Amova High Growth Fund

Fund Update: Quarter 3/2025 ending 30 September 2025

What is the purpose of this update?

This document tells you how the GoalsGetter Amova High Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Amova NZ prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Diversified portfolio. Aims to deliver higher real growth in capital value, alongside a higher volatility profile.

Total value of the fund	\$708,075
Number of investors in the fund	20
The date the fund started	3 July 2025

What are the risks of investing?

Risk indicator for the GoalsGetter Amova High Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five-year period to September 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.¹

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	%
Annual return (after deductions for charges but before tax)	%
Market index annual return (reflects no deduction for charges and tax)	%

The market index on which the annual return is based is a composite made up of the index of the underlying sector funds multiplied by the respective target investment mix. Some of the underlying sector fund index returns include imputation credits. The fund returns include imputation credits. The market index return is before tax and fees.

Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz>.

What fees are investors charged?

Investors in the GoalsGetter Amova High Growth Fund are charged fund charges. In the PDS dated 1 September 2025, these were (inclusive of GST where applicable):

	% of net asset value
Total fund charges	1.35%
Which are made up of:	
Total management and administration charges	1.35%
Including:	
Manager's basic fee	1.35%
Other management and administration charges	0.00%
Total performance-based fees	0.00%
Other charges	\$ amount per investor
Annual membership fee	\$30 per annum

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the GoalsGetter KiwiSaver Scheme Amova NZ Diversified Funds PDS for more information about those fees.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Sam made the first investment of \$10,000 in the fund at the start of the year and did not make any further contributions. As at 30 September 2025, Sam received a return after fund charges were deducted of \$672 (that is 6.72% of his initial \$10,000.00). Sam also paid \$7.50 in other charges. This gives Sam a total return after tax of \$636 for period ending 30 September 2025.²

Further information

You can also obtain this information, the PDS for the Goalsgetter KiwiSaver Scheme and some additional information from the offer register at <https://disclose-register.companiesoffice.govt.nz>.

Notes

1. Because the fund is less than five years old, the risk indicator uses returns data partly from returns of the fund, and partly (for the period October 2020 - June 2025) from the composite index. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. Performance has been calculated from 3 July 2025, when the first investment was made in the fund.
3. All investments in this fund update are described in New Zealand dollars.
