What are the risks of investing?

Risk indicator for the GoalsGetter Amova High Growth Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://sorted.org.nz/tools/investor-profiler/>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five-year period to December 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.¹

How has the fund performed?

Notes

1. Because the fund is less than five years old, the risk indicator uses returns data partly from returns of the fund, and partly (for the period January 2021 - June 2025) from the composite index. As a result of this, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. Performance has been calculated from 3 July 2025, when the first investment was made in the fund.
3. All investments in this fund update are described in New Zealand dollars.
